# What to expect with a solar installation

# Solar Installation timeline for your community

You will experience some changes as solar panels are being installed at your building. It is important to know what to expect and how long the process will take. The schedule below is an estimate. Sometimes installers will experience delays and you will be informed by your property manager of any significant changes.

#### Site Visit

Construction team checks roof size and structure, measures sun exposure and inspects electric service panel.

#### **Permit Application**

Construction team applies for and receives city permits.

#### Installation

Construction begins! Expect crews on-site and some minor inconveniences including noise and construction equipment.

#### Solar Meter

Utility company installs a solar production meter on the property.
